## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. Claims 1-8 are allowed.
2. The following is an examiner's statement of reasons for allowance: with respect to claims 1-8, patentability resides, at least in part, in the mechanism for pivotably coupling a notebook computer to a display comprising a plate-shaped latch device under the pivot board within the computer housing, wherein the latch device comprises an elongated latch board, a trigger, a finger tab, and a latch member, wherein forward movement of the trigger causes the latch member to move toward both left and right sides of the computer housing, in combination with the other limitations of the claims. It is noted that the prior art of record does not teach nor fairly suggest such limitations as claimed. Therefore, claims 1-8 are deemed allowable over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Please note the computers of Yanase (6392871), Helot et al. (6430038), Wang et al. (US2003/0034952), Weng (5253142), and Bae (6310766).
